## PREFACE.

The present rolume is an attempt to supply an admitted and long-felt want. namely, a First Gireek lionk, written in pure Attic prose, and sufficiently (easy to he putit into the hands of hoys as somin ats the Delectus has been laid aside.
some educationists, in their distrust of Xenophon: an a First Greek Book. select Homer for this pmopes, but in so doing are at rariance with their firmaan brethren; for the (iermans, whe understand Greek, and the best methonk of teaching it, noarly as well as we to, reserve Homer for a much later period in the school curriculum, from a persuasion that Homer, if an easy book for jumions to reald, is by mo means casy for them to comprehemd; and that Homer should he studied as a variant,' not taken as a pattem. Though compelled to admit the truth of the last sentence. I must be permitted, for all that, to consider Honner a much better educational hook for bors than Xenophon; for if he dues not ilo them much good. he will certainly to them no harm ; and
that is mon. than catn be sait of Xemophon. For. Xenoplon I consider an emphatically bad book. (1) he real suly iny more alvanced students, anif hy iheu whly when they are fully able to note hiinsecuracios of language, his false tenses, and hizemeral disreranl of Attie usage,-amd to asmil them in their wwn romperition. Andociles, on the contrary, hats much in his language, mattor and style which onght to recommend him to tion favourable motice of those engraged in edueations. As might the expected from his being at contemporary of Thucydides, Autipho: and Aristophanes. and an Ithenian citizen of good family, hilanguage is Ittio of the purest type, aml perfectly free not only from thuse questionable comstructions and expres-ions, which in Lencian, Xenophon and the later writers have been singled out hy th.. Erammarians for disapproval, but free likewis. from the mamerisus and artificiality which are :prominent in the compositions of Gorgias, Alc: damas and the other declaimers.

I forther attraction is offered in his mater. whivh is interesting in the highest degree, glancing. as it rloes, at the Sicilian expedition. the charge brought against . Neihiales, the mutilation of ther Hermar, the profanation of the Mysteries, the prosecutions that followed, interspersed with life-like sketehes of the more prominent actor-
in the scene, of his chief accuser Cephisius, of the informer Dioclides, of the noturious Callias son of Hipponicus, of the demagogue Agyrrhius, of Pisander the perfect democrat. so soon to ripen into the perfect oligarch, of his other accuser Meletus, a few months later th. appear as the accuser of Socrates. We may adn. that he gives us, here and there, and often at considerable length, many interesting traits of the inner life of the Athemians, as well as certain facts of Athenian polity and finance, which, but for his speech 'De Mysteriis,' would be sought for in vain.

With respect to his style, all critics are unanimous in calling attention to its extreme simplicity. See this noted in his "Life." In thisrespect Andocides is not only by far the easiest of all the Orators, but also the easiest of all the pure Attic prose writers whose works have been preserved. Indeed, the only easier picce than his 'De Mrsteriis' is the same author's speech 'De Pace.' The 'Oratio Funebris’ of Hyperides. which is also easy, camnot well be brought in here fur comparison, as being merely a fragment.

There are, it is true, some few terms of Atti. law in his 'Ile Mysteriis'; but these, I trust, wil! be found adequately explained after the best authorities. My deliberate opinion therefore is
that if the 'De Mrsteriis' be mot well fitteed tion the place I claim fir it, then no ssoch work is in existenes. 1)emosthenes is altofether too ditticult: and the writings of Antiphom. Lersias and Isaens, if less difiecult, are often hoth ohesthe and harsh. and from their matter and manner leas suited to form any part of early school work.

And now, in reference to my own share in the work, as 1 ilo not for one moment flatter myself that I have escaped the common lot of humanity, I shall be only too glail to have the mistakes I have fidlen into pointed out to me, either by public or private criticism.
W. J. H. M.

## LIFE OF ANDOCIDES.

Andocides, the second in the list of the Ten Attic Orators contained in the Alexandrine canon, was born at Athens, and, according to the best authorities, about Ol. 84. At all events the statement we find in Pseudo-Plut. ( $I^{\circ} \mathrm{it}$. I. Or. Or. 1. $^{2} 35 \mathrm{~s}$ ), that he was born Ol. 78. 1, is altogether untenahle (see Pauly's Reul-Encyclopüdie, -Ait. Andocides). His father Leogoras, who was frequently ridiculed ly the Comic writers for his luxurious style of living (Arist. Nub. 109 with the Schol. ad loc. lisp. 1269. Athen. ix. 387 . Suidas, in roc.中moravoi), belonged to one of the most ancient Eupatrid (Hermamn, l'olit. Aut. § 98. 1: § 101. 2) families, the Ceryces, whuse pedigree went back to Odysseus and Hermes (My/st. 141. 146. 147 . - De Redit.' 26. Suilas, in roc. 'Avôokiôms. PseudoPlut. Fit. .1. Orat. p. 8348). In the war of liberation against Pisistratns, and in the military uprerations against his sons, the progenitors of Andocides had played a distinguished part (:De Redit.' 26. Aryst. 106). His grandfather Andocides

## Life of

('De Pace,' 6. Aeschin. Fuls. Leg. 174) had been : membor of the Embassy (Ol. 83. 3) which concluded the Thinty Feurs Pence with the Spartans: and woulh seem also to have held in conjunction with Glatuon (Thace. i. 51) the rank of commander of the twenty ships sent by the Athenians (Ol. 85 . f) in the war between the Coreyraeans and Corinthiaus : and his uncle Epilycus had taken part in an Emhassy to Persia-probahly the same Embass! of which Callias was the head. "Andocides himself." as Ciutins remarks, "was a talented and elorpuent man, but whose oligarchical sentimentexposed him to the constant attacks of the popular party. He had already as a young man under thirty gears of age male himself -pokesman of the aristocratical circles, and opposel the popular orators who were endeavouring to overthrow the: Prace of Nieins immediately after its conclusion. Ahont the ent of May, B.C. 415, he was involved in the charge lnought against Alchiales of profaning the Mysteries and of mutilating the Merma: In the case of Andocides. this latier charge was suggestel lyy the fact, that the only Hermes-linst which remained uninjured thronghout the whole of Athens was the one that stood hefore the hous. of his father leogoras, and whith hal beent dedicated by the trilue Aigeis (Myst. 62. Nepos. Alcib. 3). In consequence of this suspicion.

Indocides and his father and several of their relatives were arrested and thrown into prison. From this perilous position he rescued himself and his associates by giving up the names of such of the actual perpetrators as were known to him. Though the informers had been assured of complete immunity ('De Red.' 27. Myst. 48-69. Thuc. vi. 60. Thirlwall, Hist. Gri. iii. 372), Andocides was nevertheless obliged to leave the city; but on what legal grounds is minnown. The author of the specch against Andociles, which is found amongst the writings of Lysias (Lys. vi. § 24), says he wapunished with di.tцpia. On the other hand, Grote (Hist. G'r. vi. 41) says, "Andociles himself was pardoned, and was for the time an object, apparently, of public gratitude. But the character of a statue$i$ reaker and informer could never be ctherwise than odious at Athens. Andocides was either banished by the indirect effect of a disqualifying decree, or found that he had made so many enemies, and incurred so much obloquy by his conduct in this affair, as to make it necessary for him to quit the city." But Grote's view of the character of Andocides suggests a doubt whether the same language would have been applied to him if he had been a man of the stamp' of Cleon. Under these circumstances Andocides went abroad, and engaged in various commercial

speculations. On the establishment of the Wiagatchical govermment he returned to Athons, honime that his conspicuous sorviees to the Athenian then: at Samos ( De lied. 11-12) would secture hite : welcome. But this hope was frustrater, owing to the political hostility subsisting between the crommanders of the flect ami the heads of the Oligareing. Pisamder, the leader of the Four Humbred. haw him arrested. and accused him of having supportsal the party opposed to them at Samos (' De Reed.' 14;. Ambociles savel himself for the time by flyins to the altar that stoon in the court. Shortly afterwards he was either ruleased, or succeeded in making his escape ('De Reclit.' 15-16. I'seudo Ly*. vi. 27-30. Psemido-Plut. Tit. .1. Oral. p. 3841 ).

On the overthrow of the Four Hundred, heine encouragel by the decree of immonity which Menippus ('De Redit.' 23) had sucoceded in getting passed, though it was afterwards caneslleal f: It. Rexit. " 27 ), Amlucides male another attenult on olitain prermission to return to Athens. But he who again disappointed. It was on this occasion that he delivered his speech - Te Fieditu.' Afeer this her appears to have lived at Elis for several rears. still carrying on his mercantile pursuits, till at length the Cinneral Amaesty which followed the expmasion of the Thirty procureal him his long-wished-for return.

He now resumed his former prominent position: in the state, and laid wut much of the weath he hat acpuired by commere in suitably discharging the duties of the several state offices to whici: he was successively electerl, such as "Gymmasiarch," and "Architheorus" to the Isthmian and Olympian games, and "Treasurer of the Sacred Momies" (Myst. 132), the last being a position of considerable importance (Bückh, I'uhl. Erom. Athen. p. 160 foll. Hermann, Polit. Ant. \$151). Three years after his return (Myst. 132), and only a few months before the prosecution of Sucrates, his former enemies, Callias, Agyrrhins. Meletus and Epichares accused him of profaning the Elensinian Mysteries, and of violating certain laws relative to the temple at Eleusis, coupling their charge with the old accusation of mutilatin! the Hermae, and urging against him that he harl never been legally freed from his aiturío. Andocides succesfully defended himself in his speech ' De. Mysteriis' - a speech surpassingeven that of Demosthenes 'De Coronat in its audacity alike of denial and of assertion, and in its perfect adaptation to the end in view-a rerdict in his farour.

Subserquent to this, and during the Corinthina Ir err, when both parties were growing weary of the contest. and when the Spartans, in consequence of Conon's victory viff Chidus, offered the.

Ithenians very adrantageous terms of peace, Andocides was one of the Embassy to Sparta. His spreech 'De Pace, delivered on his return. belongs to this period. The Athemians, however. influenced by the success of Iphicrates in destroying a Spartan mora of 250 men, and by the impression this event was reported to have made upon the minds of the Spartans, lroke off the negotiations; and Andocides was rewarded for his exertions by an action for illegul comuluct in his - mbassy ( $\pi$ аратрєण $\beta$ eiu), and banished. He never seturned again : and appears to have died soon afterwards. It may be as well here to caution the reader, that the ordinary biographies of Andocides are a perfect maze of chronological hlunders, among which the confusion of Andocides the Orator with his grandfather of the same name is one of the smallest. See these matters shown up in Pauly's Real-Encyclopuïlic. Ant. Ampreiles. init.

With recard to the pertinent question of ". $/$ mdocides' position as an Ointor:" Thirlwall (Hist. Ar. iii. 322) says. "He was a pleasing, though not a powerful orator": and Dr. Sehmitz (Smith": Drictn. Prinm.). "His orations have no manmerism in them, and are really, as Plutarch says, simple. and free from all thetorical pomp and ornament": and Pauly's Rial-Encyrlopülie (.1\%. Anducites). "The composition of his speephes is extremely
simple... His specelh De Miysteriis, in particular, is pre eminent for its warmith of expression - sopecially in the epilogue-and for its liveliness of narrative." Dr. Schmitz further remarks, "The heot among his orations is that on the Mystries: Int, for the history of the time, all are of the highest importance." Pauly": Rimi-Fimeycropientie
 an acoont of the practical nature of its contents. $\therefore$ an important supplement to our other sources nif infmation respecting the proseution comecten with the mutilation of the Hermae, and for the -tate of the times immediately succeeding the "estoration of the democracy." On the peculiarities of Andocides' style, Pauly's Reml-E:corlonieulie mamk:, "His style is characterised ly a frecquent epectition of the same thought or of single words M/yst. 56. 58. $70-73$. 80-81) ; by a lonser conneection of his sentences ('De Iied.' 3. Myst. 1. 2. 57-59. 137-139. 140-145) ; by his tendeney to hreak off the construction he has begun, while he interposes an intermediate clause and then resumes the eonstruction with a $\delta \dot{e}$. or oitos, or oitos jé (MY/st. 27. 141. 149. 'De Pace.' 5. 34): and by his aroidance of almost all rhetorical figures. with the exception of Anaphora and Interrogation."

$\pi \epsilon \rho \grave{i} \tau \hat{\omega} v \mu v \sigma \tau \eta \rho i \omega v$. Feiske takes this as in apposition to $\pi \epsilon \rho i$ aủ $\hat{\eta} s$ $\tau \hat{\eta} s$ airias, that is to say, "about the Mysteries." But the construction even then remains embarrassed through the omission of eita ôè (=and then), which in Andocides, at least, is the usnal correlative to $\pi \rho \omega \bar{\omega}$ о $\mu \dot{\epsilon} \nu-43.46 .47 .50 .56$, -though in $\S 144$ we find inecta $\partial \dot{\epsilon}$, and in § 132 èrecta alone. I am, therefore, inclinel to suspect that, in the original text, cira $\hat{\partial} \dot{\epsilon}$ came in before $\pi \epsilon \rho i \quad \tau \hat{i} \nu \mu \mathrm{\mu} \sigma \tau \eta p i \omega v$. I recently collatel a ms. in the British Musemm, in which the aherrations were at the rate of fourteen to every three paragraphs ; and as regards mmisions, in one passage twenty-six consecutive words were leit out, while omissions of eight, or more words, were of frequent occurrence. Proof enough that the omission of cira $\overline{0} \dot{\varepsilon}$ in this passage is, at least, a possiluility:

[^1]The agent in the dative, instead of $i \pi$ ò with genitive, is common enough with perfects passive, and commoner still with perfect participles passive. See 29. 63. 70. 71.  accuracy of individual Greek writers than their use of the passives (or equivalent forms) with ino and a genitive. In the best writers this genitive almost invariably denotes personal, or at least living objects. Thus, while Aeschines in his three orations, containing 6,016 lines, exhibits five instances where sucl: oljects are incunimate and impersonal (Ctes. 7. 207. 239. Timutech. 178. Fals. Leq. 62.), Xenophon in his "Convivium" and "Oeconomicus" (in which latter work I can diseem no grammatical or stylistic reasons for questioning its authorship), though he uses $i \pi$ ò with a genitive only forty-three times, yet has no less than twenty-two examples of this faulty construction in the space of 3,466 lines ! and in one passage (Occon. xix. 11) has three such in the same paragraph. On the other h:and, in the three genuine orations of Andocides not one single instance is to be found-for $\hat{\delta} \epsilon \sigma \mu \omega \hat{\omega}$ in $\$ 2$ implies living agents ; nor yet one in Hyperides, if we exeept $c$. > "The story which Andocides represented himself to have conmmnicated to the Senate is probably not the story which he really did tell-certainly not that which his enemies represented him as having told ; nor does it agree with the brief introduction of Thucydides (vi. ©0), who tells us that Andocides impeached himself along with others as a participant in the mutilation. We may be sure, therefore, that the tale which Andocides really told was something very different from what now stands in his Oration. But what it really was we cannot now make out," Grote, Hist. Rul. iii. p. 597 b. For air $\hat{6}$ in all such passaces as this, some modem scholars, especially Bekker and Shilleto, invariably read air $\hat{3}$. To be guided in these matters solely by the anthority of mss., where the decision turns upon the
presence or absence of an aspirate (Kriiger, Gir. Gr: §51. 2. obs. 6) would be not a little hazardous; and, on the other hand, it would be more hazardous still to choose beforehand one particular form to be used in all passages, as Shilleto (Praefat. Dem. Fals. Leg. p. viii.) would seem to have done. In Dem. Fuls. Leg. §57, where Schäfer, Dindorf, and Bekker read airê, Vömel (ad loc.) remarks : "airẹ Shilleto, de suo. Perperam." Cf. Schäfer, Plut. vi. p. 495. A better rule is to consider whether the pronoun should be regarded as part of the thoughts of the narrator (air $\hat{\varphi}$ ), or should be referred to the mind of the person spoken of (airê). See an instructive example in Xen. Conviv. ix. 6.

## ELEMENTARY CLASSICS.

18mo, Eighteenpence each.

Tiils Series falls into two Classes-
(1) First Reading Books for Beginners, provided not only with Introductions and Notes, but with Vocabularies, and in some cases with Exercises based upon the Text.
(2) Stepping-stones to the study of particular authors, intended for more adranced students who are beginning to read such authors as Terence, Plato, the Attic Dramatists, and the harder parts of Cicero, Horace, Virgil, and Thucydides.

These are provided with Introductions and Notes, bu't no Vocabulary. The Publishers have been led to provide the more strictly Elementary Books with Tocabularies by the representations of many teachers, who hold that beginmers do not understand the use of a Dictionary, and of others who, in the case of middle-class schools where the cost of books is a ser.ous consideration, adrocate thee Tucabulary system on grounds of economy: It is hopet? that the two parts of the Series, fittiner into one anothor, may together fulfil all the requirements of Elementary and Preparatory Schools, and the Lower Foms of Pullic Schools.

The following Elementary Buoks, with Introductions Notes, and Vocabularies, and in some cases will Exercises, are either ready or in preparation:-
